U.S. Environmental Protection Agency Reviews Cleanup at Hiawatha Blvd Former Municipal Gas Plant (MGP) Subsite of Onondaga Lake Superfund Site

The U.S. Environmental Protection Agency is conducting the first five-year review of the **Hiawatha Blvd Former Municipal Gas Plant (MGP) subsite** of the Onondaga Lake Superfund site, located in the City of Syracuse in Onondaga County, New York. The Onondaga Lake Superfund site includes Onondaga Lake and a number of other sites that are situated on Onondaga Lake's shores or tributaries that have contributed contamination to, or threaten to contribute contamination to, Onondaga Lake. These sites, as well as the Onondaga Lake Bottom, are referred to as "subsites" of the Onondaga Lake site.

This review seeks to confirm that the cleanup being conducted at the subsite continues to protect human health and the environment. Cleanup activities include *in-situ* (in-place) solidification of about 15,000 cubic yards of contaminated soil, enhanced bioremediation of contaminated groundwater along portions of the New York State Barge Canal and Onondaga Lake, installation of a soil cover system, development of a Site Management Plan, and institutional controls.

Cleanup activities began in 2012 and are continuing. A summary of the cleanup activities and an evaluation of the protectiveness of the implemented cleanup remedy will be included in the five-year review report.

What is an EPA Five-Year Review?

The purpose of five-year reviews is to ensure that implemented cleanup remedies at Superfund sites function as intended and continue to be protective of human health and the environment. These regular reviews, which are required by federal law when contaminants remain at a site, include:

- Inspection of the site and cleanup technologies;
- Review of monitoring data, operating data, and maintenance records; and
- Determination if any new relevant regulatory requirements have been established since the original cleanup decision was finalized.

When will EPA's Five-Year Review Report be available?

It is anticipated that the five-year review report will be available at the website noted below by summer 2017.

For more information

There are several ways to review information on this site. The Administrative Record, which includes the decision documents used for selecting the cleanup remedy, is available for public review at the information repositories listed below. Project information is also available online at the website noted below.

NYSDEC, Region 7

615 Erie Blvd. West, Syracuse, NY

Onondaga County Public Library

447 South Salina Street, Syracuse, NY

NYSDEC, Central Office
